

## **New product introduction at InnoTrans 2024: The passenger seat NEW REGIO - Sustainable and flexible in regional transport**

**Ursensollen, September 24, 2024** – We are pleased to announce the launch of our latest product, the passenger seat NEW REGIO, at this year's InnoTrans. The seating platform is specifically tailored to the requirements of regional transport and its challenges regarding sustainable solutions and flexible passenger compartment design, setting new standards in terms of comfort and design.

The NEW REGIO is made from a flexible high-tech fabric that allows for ergonomic seating. Its intelligent frame construction is made from recyclable monomaterial, making it an ideal choice for a closed-loop economy.

Key features of the NEW REGIO:

**Adaptive seating platform:** Our flexible platform allows for different levels of value and equipment to meet the individual needs of passengers. Parameters such as length, height, width, or seat angle can also be flexibly adjusted.

**Circular Ready:** With a significant CO2 reduction compared to conventional solutions, the NEW REGIO is a pioneer in terms of sustainability.

**Ultra-light:** The NEW REGIO weighs significantly less than comparable products, leading to improved energy efficiency.

**Established Technology:** The NEW REGIO uses proven technologies to ensure high durability and reliability.

**Up- and Down leveling:** The NEW REGIO can be adjusted to different comfort levels due to its variety of equipment to meet the different requirements of passengers.

We are convinced that the NEW REGIO will modernize the travel experience for passengers in regional transport and look forward to presenting this innovative product at InnoTrans.
